SRS Document for Currency Converter App (3 Pages – College Format)

Project Title: Currency Converter Application

1\. Introduction

1.1 Purpose

The Currency Converter App is a software application that converts one country's currency into another using exchange rates. It helps users calculate currency values quickly and accurately.

1.2 Scope

This application supports multiple international currencies and provides instant conversion. It is useful for students, travelers, businesses, and online shoppers.

1.3 Objectives

- Convert currencies in real time.
- Support multiple world currencies.
- Provide accurate exchange rates.
- Easy and user-friendly interface.

2\. Overall Description

2.1 Product Perspective

The Currency Converter is a standalone application that accepts an amount, source currency, and target currency, then displays the converted value.

2.2 Product Features

- User login/logout.
- Select From Currency.
- Select To Currency.
- Enter amount.
- Convert instantly.
- Display exchange rate and converted amount.

2.3 User Characteristics

- Students
- Travelers
- Business users
- General public

2.4 Assumptions

- Internet connection is available for updated exchange rates.
- User enters a valid amount.

3\. Functional Requirements

- User can log in.
- User enters currency amount.
- User selects source currency.

- User selects target currency.

- System converts the amount.

- System displays converted value and exchange rate.

Non-Functional Requirements

- Performance: Fast conversion.

- Accuracy: Correct exchange rates.

- Security: Safe user login.

- Usability: Simple and easy interface.

4\. System Requirements

Hardware

- Android Phone / Computer

- 4 GB RAM

- Internet Connection

Software

- HTML, CSS, JavaScript

- VS Code

- Chrome Browser

5\. Conclusion

The Currency Converter App is a simple and efficient application that converts currencies accurately using current exchange rates. It provides a fast, user-friendly, and reliable solution for international currency conversion.
